- Inventory Polling and Management
- Full-Service Alarm Management and Reporting
- Storage Tank Compliance and Service Management
- Spill and Emergency Response Program Management
- Testing and Certification Program and Permit Management
- Assessment and Training Platforms
- Turnkey Equipment Solutions

# OUR SOLUTION: YOUR SINGLE SOURCE

## FUEL MANAGEMENT

With fuel being one of the highest expenses of your business today, accurate fuel levels and delivery information greatly impact your profits and cash flow. Ryder Fuel Services professionals will manage your fuel management needs, allowing you to maintain optimized inventories and delivery schedules, thereby reducing the costs associated with fuel runouts and haulbacks. The Ryder Fuel Services solution gives you visibility into your inventory, allowing accurate and timely fuel assessments. This ensures consistency and cost savings. As a leader in the industry, we can help you respond and stay ahead of ever-changing markets.

## ALARM/SERVICE MANAGEMENT

Ryder Fuel Services Alarm Management provides you with a proactive approach to ensuring site issues and system problems are addressed immediately, before they become a serious threat. Our Alarm Management Service is a combination of alarm triaging and compliance management. Ryder Fuel Services professionals leverage technology to eliminate manual processes and continuously monitor the safety and proper functioning of underground and aboveground storage tank systems. Using a centralized system, we are able to create an environment for our customers where problems are accurately identified and addressed in a timely manner. This approach not only streamlines management of the fueling facility, it also mitigates risk and reduces the overall maintenance costs on-site.
